Visual Studio Code, Jira, Kanban,
JSON, Karma

Skills

- CRUD operations
- Administration panel
development
- Responsive web development
- Database design
- Client-server architecture
- Technical documentation
- Project presentation

I am an entry-level software developer who gained experience with modern web technologies during a five-year Software Development and Testing program. My primary interest is full-stack development, and I am proficient in Git-based version control and collaborative teamwork. My goal is to contribute to real-world projects as part of a development team while continuously expanding my technical knowledge and professional skills.

Professional Examination Project | 2026

As part of a two-person team, we developed a fully responsive web application.

- Contributed to both frontend and backend development.
- Developed the frontend using Angular, HTML, CSS, and Bootstrap.
- Built the backend with Express.js, communicating with the client through REST APIs.
- Designed and managed an SQL database, with data exchanged in JSON format.
- Developed the administration panel for managing users and application data.
- Implemented CRUD operations across multiple modules of the application.
- Used GitHub for version control and followed Agile development practices throughout the project.
- Presented and defended the project during the oral part of the final professional examination, explaining the development process and the technologies used.

IT Fundamentals | 2026

Knowledge acquired through the Digital Culture secondary school final examination:

- Microsoft Office (Word, Excel, Access, PowerPoint)

Training and Certifications

2023

- Sectoral Basic Examination: Information Technology and Telecommunications Fundamentals
- Design and simulation of home and small business networks using Cisco Packet Tracer
- Website development and coding
- Fundamentals of Python programming

2022

PAR 4.0 Foundation Training

Completed under the GINOP-6.1.10-VEKOP-19-2020-00002 priority project.

Successfully completed a closed electronic distance learning program.
